

Wandr

COMPANION FINDING PLATFORM

WANDR 

AGENDA

- Project Overview
- Problem Statement
- Target Users
- User Flows

PROJECT OVERVIEW

Wandr is a modern web application designed to combat social isolation by helping people find companions for real-world outings. The platform connects "Hosts" (those offering availability) with "Joiners" (those seeking companionship) in a safe, intuitive environment.

Value Proposition

- Combat Loneliness: Dedicated space for social connection.
- Safe Connections: Built-in safety features and verification.
- Diverse Activities: From coffee meetups to hiking adventures.
- Modern UI: Clean, responsive design built on SaaS principles.

FLOW:

Given a rough prompt to ChatGPT Prompt Maker-> Given the generated prompt to Lovable AI to create an MVP

PROBLEM STATEMENT

Social isolation and loneliness are growing concerns in modern society. Many people want to engage in activities but lack companions to join them. Wandr bridges this gap by:

- Providing a judgment-free space to find activity partners
- Matching people based on interests and availability
- Making it easy to organize and join local outings
- Building community through shared experiences

USER PERSONAS

Sarah
Junior Software Engineer

- Sarah moved across the country for a new job. She finds it difficult to meet people outside of her immediate colleagues.
- She wants to explore the local hiking trails and coffee shops but feels intimidated going alone.
- GOAL: To find one or two people for a Saturday morning hike or a casual coffee session to build a local social circle.

David
Retired Teacher

- With his children grown and moved out, David has a lot of free time. He loves showing people the "hidden gems" of his city.
- He believes in the power of community and wants to help younger generations feel welcome.
- GOAL: Host small group walks through historic neighbourhoods for anyone interested in learning about the city.

Marcus
Graphic Designer

- Deeply into the local board game and indie music scene. He's always at the latest cafe or record store but often finds himself wishing he had a "regular" group to go with.
- Wants to curate experiences for others and share his passion for niche hobbies.
- GOAL: To create "Outings" for specific events like vinyl listening parties or board game nights to find like-minded enthusiasts.

Elena
Freelance Writer

- Self-described "social introvert." She craves human connection but finds large parties or loud bars draining. She prefers one-on-one or small-group interactions.
- Looking for low-stakes, quiet activities like visiting an art gallery or a book club discussion.
- GOAL: To join small, quiet outings where the focus is on a shared activity rather than constant "small talk."

USER FLOW

The Joiner Journey

Goal: Find an activity and successfully attend.

- Entry: User arrives at the Landing Page and clicks "Explore Outings."
- Search: Filters outings by Category (e.g.,  Hiking) and Date.
- Evaluation: Clicks on a specific Outing Card to view the host's profile, location details, and description.
- Action: Clicks "Request to Join."
 - If not logged in: Prompted to Signup/Login.
 - If logged in: Sends request to the Host.
- Waiting Room: User sees a "Pending" status on their Profile Dashboard.
- Confirmation: Receives a notification/toast when the Host accepts.
- Completion: User views the final meeting instructions and attends the event.

USER FLOW

The Host Journey (Creation & Management)

Goal: Organize an activity and manage participants.

- Initiation: User logs into their account and clicks the "Create Outing" button.
- Setup: Fills out the Create Outing Form (Title, Category, Date, Max Participants, Description).
- Publish: Clicks "Publish Outing." The activity is now live on the Explore page.
- Management: Host receives a notification when a Joiner requests to participate.
- Review: Host visits their Profile/Dashboard to view the Joiner's profile and interests.
- Decision: Host clicks "Accept" or "Decline".
- Execution: Once the group is full or the date arrives, the Host coordinates the final meetup details.
