

PROBLEM STATEMENT

As a person who struggles to stay focused while working or studying due to frequent mobile and digital distractions, I want a tool that helps me stay off non-essential apps or websites, track my focus sessions, and reward me for staying committed – so that I can build healthier screen habits and improve my productivity.

User Research

User 1: Siddarth (Age: 17, Class 10 Board Examination Aspirant)

- Spends most of the time playing games
- Struggles to balance work-life structure.

User 2: Sejal (Age: 23, Currently pursuing MBBS)

- Gets distracted by constant notifications from WhatsApp & email.
- Hard to track how many hours were actually focused vs. distracted.

User 3: Ayushi (26, Software Developer)

- Casually checks social media and spends hours
- No clear sense of how much productive time she actually got.

USER PERSONAS

Short Description

- A school-going student and a social media addict
- Age: 17 Location: Noida, Uttar Pradesh
- 10 Class Student

Key Attributes:

- Gaming junkie and unorganized
- Spends almost most of the time gaming
- Distracting Apps: BGMI, Valo

Needs

- An app that blocks gaming apps to help focus on studies
- Progress reports to show parents while studying for boards examinations

Opportunities

- Can block gaming applications.
- Show progress report to parents.

Challenges

FLOWS

Task Flow (Start a 30-min Focus Session)

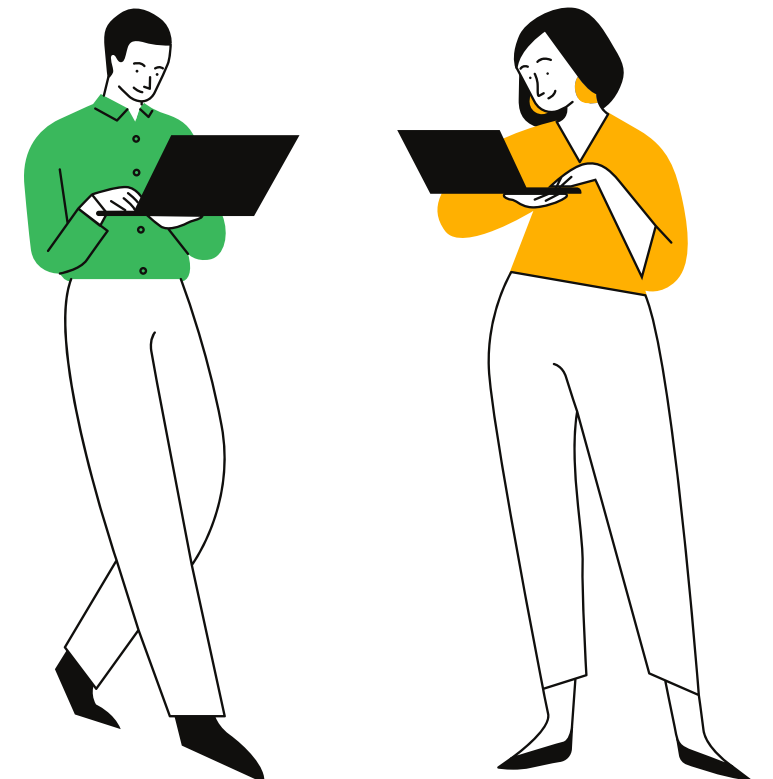

Open app → Select duration (30 mins) → Pick apps to block → Start session → Timer countdown → Completion + reward.

User Flow (New User Onboarding)

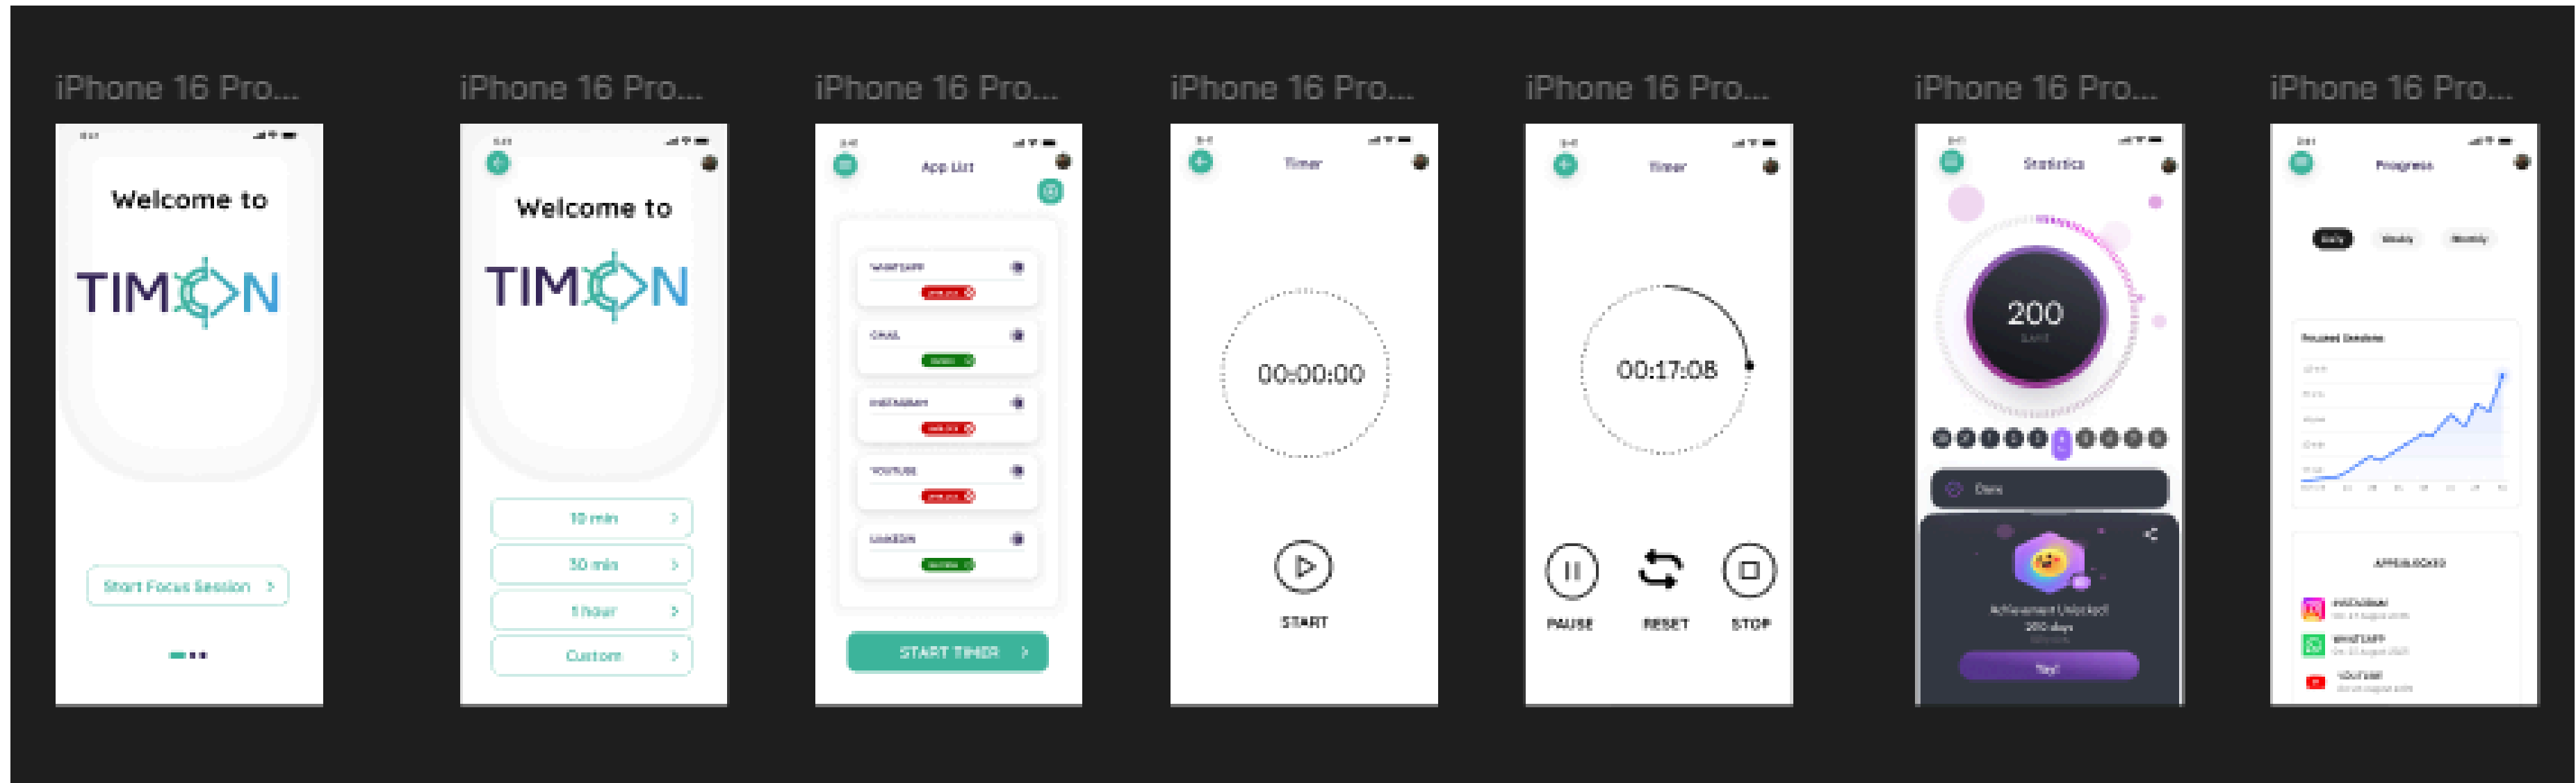

Download app → Sign up → Select work style (study/work/freelance) → Pick distracting apps → Start first focus session → View progress → Build streaks.

Wireflow (Screens)

1. Onboarding screen
2. Dashboard
3. Focus timer screen
4. Reward screen
5. Progress screen

Usability Testing Plan

Task to Test with Real Users

1. Able to start a 30-minute focus session and block applications.
2. Complete the session and see progress.
3. Share the progress with friends and family.

Metrics

1. User Satisfaction based on Post-task ratings.
2. A standard 10-question survey to give a usability score out of 100.
3. Net Promoter Score: Recommendation of apps to others.

Iteration Plan

1. If users struggle, simplify the onboarding flow.
2. Make sharing progress button more prominent, and provide clearer reward feedback.
